Master's Degree in Technology and Security

Join us in the only **online technology and security master's degree**; tackle real-world problems under the guidance of **internationally renowned experts** in the field, through an innovative and rigorous **'learning-by-doing'** education model, with curriculum informed by insights gained from EU-funded research projects. Collaborate with a **community of likeminded students**, while retaining your **autonomy**, and be **supported** by an administrative team who are dedicated to facilitating **your academic success**.

In a world increasingly implicated by **technological security** and policing challenges, the combination of a **solid theoretical foundation** in **technology, surveillance** and **security** theory; an in-depth **understanding of security law and policing strategies**; and practical training in **democratic control** and **policy evaluation**, will prepare you for a **successful career** in **security and crisis planning**, security and law enforcement **polycymaking** and many other professions in both public and private sectors.

Interested in furthering your understanding of technology and security challenges, and opportunities, in our increasingly digital world?

AIMS AND SKILLS

Gain theoretical understandings of insecurity; technical abilities to manage security policies; evaluate best and worst practices of security and policing; develop and manage academic and consulting security related projects; assess, respond to and improve security demands and related public policies; develop democratic governance of security; deeply understand security risks and potentials of technologies.
